Oncology Tumor
Board Collaborator

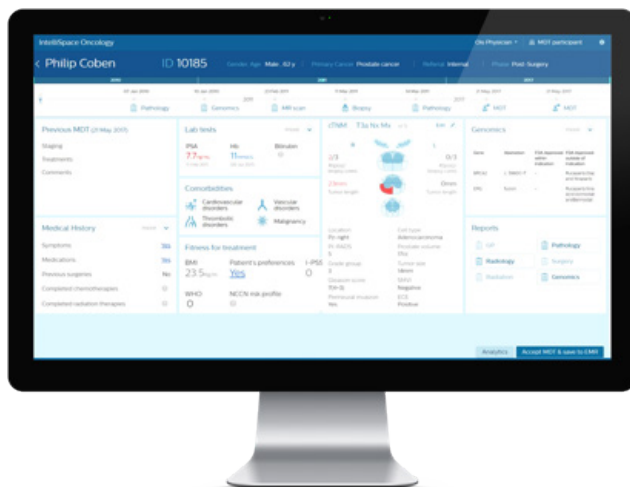

Optimize clinical decisions with more efficient tumor boards

Tumor board management

Schedule, prepare, manage, and aid collaborative decisions for the multidisciplinary teams.

Longitudinal patient timeline

Help clinicians navigate through their patient's history and provide quick access to relevant reports and radiology and pathology images.

Automatic aggregation of relevant data

Bring actionable clinical patient information together from disparate sources, including EMRs, lab systems, pathology, radiology and genomics.

Rich dashboards

Facilitate collaborative diagnostic, treatment and follow-up decisions by Multidisciplinary and Molecular Tumor boards.

Similar patients cohort analysis

Leverage your cancer registry information to help improve quality of care.

Standards-based EMR integration

Connect with Philips IntelliBridge Enterprise providing a single, standards-based point of interoperability, while reducing complexity and cost in your healthcare environment.
